NETFLIX DESCRIPTIVE ANALYTICS — DATASET

Synthetic project dataset prepared specifically for the 20-page Netflix Descriptive Analytics Report. The dataset is illustrative and is not proprietary Netflix data.

Dataset Overview

Dataset Type	Synthetic Netflix content analytics dataset
Records	20 representative Netflix titles
Observation Focus	Content mix, genre, geography, release year, seasons, episodes, viewing and engagement
Primary Analytical Use	Descriptive analytics: volume, value/viewing concentration, genre distribution, regional distribution and engagement
Important Note	Values are simulated for academic/project reporting and should not be interpreted as official Netflix statistics.

Field Dictionary

Field	Description
Title	Netflix title used for the analysis
Genre	Primary genre classification
Content_Type	Movie or TV Series
Country	Primary production country
Release_Year	Year the title was released
Seasons	Number of seasons; 1 for movies
Episodes	Number of episodes; 1 for movies
Hours_Viewed_M	Synthetic viewing volume in millions of hours
Platform_Rank	Illustrative ranking indicator
Engagement_Score	Illustrative engagement score from 1–10

Raw Dataset — Netflix Titles

Title	Genre	Content_Type	Country	Release_Year	Seasons	Episodes	Hours_Viewed_M	Platform_Rank	Engagement_Score

Roma	Drama	Movie	Mexico	2018	1	1	1	8	1
The Adam Project	Sci-Fi / Adventure	Movie	USA	2022	1	1	1	7	1

Derived Fields / Suggested Aggregations

For the report, the dataset can be aggregated by Genre, Content_Type, Country, Release_Year and Title. Recommended descriptive measures include total and average Hours_Viewed_M, title counts, average Engagement_Score, content-type share, genre share and geographic concentration. These aggregations support the same descriptive analytics framework used in the supplied bank report, adapted to Netflix content analytics.

Data Governance Note

No claim is made that these rows represent Netflix's actual internal viewing records. They are a controlled synthetic dataset intended to reproduce the structure needed for an academic descriptive analytics project.
